

Business Analyst –Management Consultant (m/w)

Wohnort: Schweiz
Reisen/Flexibilität: Reisebereitschaft
Anstellungsart: Festangestellt ohne Umzug

Eigene Vorstellung des Bewerbers

I noticed that you are looking for a dynamic and highly motivated candidate for your above mentioned position?!? I would like to introduce myself as such a candidate combined with my analytical and pragmatic spirit.

Respective awareness has allowed me to acquire a quite diverse background both on personal and professional level; completing business degrees in Asia-Pacific, Latin America and Europe. Having dealt with international exposure on different academic and consulting projects I was able to experience and prove my awareness of different nationalities and mentalities in several situations. My background has guided me through systematic researching, analytical thinking and information evaluation but most of all provided me with a deeper insight into international economic issues and the subsequent impact on real business in a dynamic multicultural environment.

Through my experience in different Consulting and Strategy departments of global players setting international benchmarks, I was able to pro-actively contribute to the company's achievements. This included a successful international turnaround project. Where I could prove my analytical talent by identifying and re-define the company's KPI's in order to align its markets and operations. In my current position I have pushed successfully a number of global and regional business process optimization projects along the whole value chain. Due my result orientated drive and "Can Do!" mentality I was able to identify and implement effective pragmatic organizational changes under high working pressure. Believing firmly to maintain and value the importance of each individual by building relationships across hierarchical levels and cultures in order to create motivation and trust for change management implementations.

I believe that my unique and diverse mix of previous work experience, education, and motivation to succeed will validate my application as a Senior Consultant at PT Management.
